

# FAKRO ROOF WINDOWS IN HOTELS ALL OVER THE WORLD

It is widely known that an abundance of natural light in the room has vital and beneficial impact on mood of its residents. This is of great importance not only in houses or flats, but also in hotels. The correct arrangement of windows and ample natural light make guests coming back from holiday satisfied and completely relaxed. In order to ensure daylight in every room it is sometimes required to take advantage of special solutions. You will find below hotels from different countries where thanks to the installation of FAKRO roof windows dark rooms have turned into magnificent apartments under the sky.

## Hotel Gasterij De Roode Schuur Nijkerk – Netherlands

Unusual horseshoe-shaped roof design has been covered with a thatch. The roofing material covers most of side facades, resulting in intriguing visual effect. In order to ensure the right amount of light in the hotel, rooms have been equipped with large FAKRO roof windows painted in colours from the RAL palette to match perfectly with architectural concept. Large vertical glazing has been incorporated into wooden finish of the front and back facade to make the building look light and fresh.

influence of natural light on the well-being. The entire facade in graphite colour has been decorated with large combination of FAKRO roof windows and vertical windows. Vertical glass stripes symmetrically arranged along the facade not only provide natural light, but also make the building change its appearance depending on time of the day and season of the year.

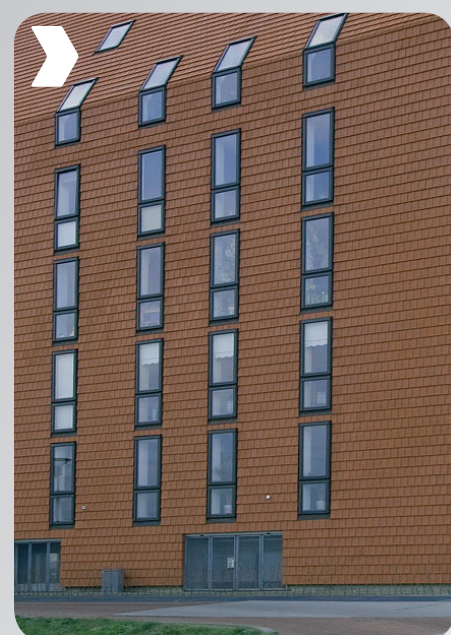

## Apartments in Rosevia Resort – Poland

Rosevia Resort is a complex of objects located in the close proximity of Rozewie Lighthouse between popular seaside cities Władysławowo and Jastrzębie Góra. The architecture and infrastructure of the resort embedded in the Coastal Landscape Park make this a unique, exciting and magical place. Thanks to the application of FAKRO roof windows, guests of the resort can find delight in wonderful view of the sea and surrounding nature also from the rooms situated in the attic.

## Apartments in Het Groene Hart – Netherlands

The architect was well aware of the

## Complex of Vosseborg apartments – Netherlands

A number of unique solutions have been incorporated into design of the project. A special covering has been applied along the side walls and the roof. A stylish supplement to the facade is the combination of FAKRO roof windows that run along the entire wall, inviting a large amount of natural light into the room.

## Herbarium Hotel – Poland

Herbarium Hotel&SPA is a luxurious resort located in a 6-hectare nineteenth-century park. A trademark of this place is a harmonious combination of the history of old manor house with modern design. The theme of the hotel is aromatherapy with herbs whose gentle aroma fills the air in the garden and in the park. FAKRO roof windows have been installed in modern and comfortable interiors thanks to which natural light highlighted the historic character of rooms.

## Guest house in Przewłoka – Poland

Small guest house in the village of Przewłoka built on a rectangular plan with a compact shape resembles a country cottage. The aim of the project was to combine tradition visible in the outside appearance and modernity perceptible inside. Thatched roof with bright facade decorated with wooden beams gives this place an idyllic climate where a touch of modernity can sneak thanks to applying a large number of FAKRO windows.

## Monticelli Terme Hotel – Italy

Spa & Thermal Pools located by Monticelli Hotel in the province of Parma, Italy. The building is equipped with indoor swimming pool where you can relax and regenerate your power. Green roof over the swimming pool has been fitted with FAKRO type C flat roof windows with durable polycarbonate dome. This solution

allows not only for the influx of high quantities of natural light, but also gently blends into the surrounding landscape.

## Sprøtoften Boligforening – Denmark

The building of the hotel featuring traditional design where a large number of windows have been installed in each room in order to provide ample natural light. FAKRO roof windows have also been installed in rooms in the attic. Applied roofing together with brick facade creates a coherent whole with modularly incorporated balconies and windows. As in the other examples, this object has been designed in accordance with the vision of the influence of natural light on mood of its residents.
